CAMPERVAN COVER

The campervan cover protects your van from the damages caused by rain, sun, bird droppings, resins, salt. The assemblage operation is very simple and quick so that can be made by one person thanks to the particular assemblage system. The cover is made of a special fabric which is impenetrable from atmospheric agents and pollution but has a pliant and soft the internal surface in contact with the bodywork. Moreover is equipped with a strong bag for a proper storage and transport.

SET UP:

- unroll the cover on the side of the camper,
- throw the rope on the opposite side,
- hoist the cover on the vehicle,
- close the zipper, fix the side hooks, the front and rear one
- fix the elastic front and rear ropes but pay attention to put them in the correct holes.
